- MVS Metrics display for Channel Management

MarineNet Video Services is an exclusive platform open only to registered users of MarineNet and is hosted by the Marine Corps University's College of Distance Education and Training.

*CAC login required to view CUI videos.

SOME FACTS

MVS works on all devices so you can view or upload videos from home, work, or the field.

Units and schoolhouses can sponsor their own channel and can manage the upload and review process of generated content.

Training

Take your training to the next level with user-generated video-based training.

Bridge the gap that exists between doctrine, formal distance learning modules, resident schoolhouse training, and on-the-job training.

Accessibility

Offers single sign-on from MarineNet, requiring all users to have an active MarineNet account.

Users can access videos using their CAC* or username and password login.
