

OCCUPATIONAL FIELD EXPANSION COURSE

Purpose

To reinforce the education delivered during the curriculum and enhance the students' ability to blend the military art (education) with the military science (training) to **increase their proficiency in their primary MOS.**

Method

- The Fall OFEC period is one week in length and focuses on **refreshing and expanding the students' knowledge** within their individual MOS.
- The Spring OFEC period is three weeks in length and concentrates on **further developing the students' MOS proficiency** as they prepare to re-enter the Operating Forces.

Endstate

EWS graduates **demonstrate proficiency in their respective MOS** and effectively employ their MOS skillsets when planning the tactical operations of an integrated combined arms MAGTF.

MAGTF OPERATIONS ASHORE

Purpose

To educate students on the elements of the MAGTF through the lens of the Single Battle Concept using our Maneuver Warfare philosophy.

Method

Through a single scenario beginning with IPB, eight sub-courses consisting of C4I, ISR, Fires, Logistics, Aviation, MAGTF in the Offense, MAGTF in the Defense, and Expeditionary Landing Team are executed in iterations of 3-day rotations.

Endstate

EWS graduates will be able to **integrate all warfighting functions** and plan for the doctrinal employment of a **combined arms MAGTF ashore** through the use of expeditionary enablers to execute **complex and distributed naval expeditionary operations**.
