

26 March 76

Dear Prof. Ericson

Mr. Chuck Spinney mentioned that you would be interested in some ideas that I have put together in a paper titled "Destruction and Creation".

The ideas expressed in this enclosed paper represent a pattern of thoughts that have been welling up and taking form since 1960. The pattern as now surfaced includes the ideas and thoughts of many others, as well as my own observations and impressions. While the individual ideas and thoughts are not new per se, I believe the concept or pattern as now evolved has a cast or twist previously not articulated.

Would appreciate your review, comments and an appointment to discuss the paper with you.

Sincerely

John R. Boyd

Dear Prof Ericson,

Mr Chuck Spinney mentioned that you would be interested in some ideas that I have put together in a paper titled "Destruction and Creation".

The ideas expressed in this enclosed paper represent a pattern of thoughts that has been swelling up and taking form since 1960. The pattern as now shaped includes the ideas and thoughts of many others, as well as my own observations and impressions. While the individual ideas and thoughts are not new per se, I believe the concept or pattern as now evolved has a cast or twist previously not articulated.

Would appreciate your review, comments and an appointment to discuss possible publication.

Sincerely
John R Boyd
