John R. Boyd

The Essence of Winning & Losing

*28 June 1995
John R. Boyd*

Key Statements

- *Without our genetic heritage, cultural traditions, and previous experiences*, we do not possess an *implicit* repertoire of psychophysical skills shaped by environments and changes that have been previously experienced.
- *Without analyses and synthesis*, across a variety of domains or across a variety of competing/independent channels of information, we cannot evolve new repertoires to deal with unfamiliar phenomena or unforeseen change.
- *Without a many-sided implicit cross-referencing process of projection, empathy, correlation, and rejection*, (across these many different domains or channels of information), we cannot even do *analyses* and *synthesis*.
- *Without OODA loops*, we can neither sense, hence observe, thereby collect a variety of information for the above processes, nor decide as well as implement actions in accord with those processes.

or put another way

- *Without OODA loops* embracing all the above and *without* the ability to get inside other *OODA loops* (or other environments), we will find it impossible to comprehend, shape, adapt to, and in turn be shaped by an unfolding, evolving reality that is uncertain, ever-changing, unpredictable.

**We can further clarify
these statements and
their interactions by the
following sketch**

The OODA "Loop"

Sketch

Insights

- Note how orientation shapes observation, shapes decision, shapes action, and, in turn, is shaped by the feedback and other phenomena coming into our sensing or observation window.
- Also note how the entire "loop" (not just orientation) is an ongoing many-sided implicit cross-referencing process of projection, empathy, correlation, and rejection.

Illumination

By pulling all this together, we can see that the *Key Statements*, *OODA Loop Sketch*, and related *Insights* represent an evolving, open-ended, far-from-equilibrium process of *self-organization*, *emergence* and *natural selection*.

John Byrd

Key Statements

II

- Without Genetic Heritage, Cultural Traditions and Previous Experiences we do not possess an implicit repertoire of psychophysical skills shaped by environment and changes that have been previously experienced.
- Without Analyses and Synthesis, across a variety of domains or across a variety of competing/independent channels of information, we cannot evolve new repertoires to deal with unfamiliar phenomena or unforeseen change.
- Without a many-sided implicit cross-referencing process of projection, empathy, correlation, and rejection (across these many different domains or channels of information) we cannot even do Analyses and Synthesis.
- Without OODA loops we can neither sense, hence observe, thereby collect a variety of information for the above processes, nor decide as well as implement actions in accord with those processes.
or put another way
- Without OODA loops embracing all the above and without the ability to get inside other OODA loops (or other environments) we will find it impossible to comprehend, shape ~~adapt~~ to, and in turn, be shaped by an unfolding, evolving ~~reality~~ reality that is uncertain, everchanging, unpredictable.

We can further clarify these statements and their interconnections by the following sketch

III

The OODA "Loop" Sketch

The Analytic/Synthetic Process by Which our Mental Orientation Interacts With the External World is an Evolving, Open-Ended, Far-From-Equilibrium Process with Positive as Well as Negative Feedback.
(Source: Boyd 4-5)

Insights

- Note how orientation shapes observation, shapes decision, shapes action, and, in turn, is shaped by the feedback and other phenomena coming into our sensing or observation window.
- Also note how the entire "loop" (not just orientation) is an ongoing many-sided implicit cross-referencing process of projection, empathy, correlation, and rejection.

Illumination

By pulling all this together, we can see that the Key Statements, OODA Loop Sketch, and related Insights represent an evolving, open-ended, for-from-equilibrium process of Self-Organization, Emergence, and Natural Selection.
