**Intelligence Estimate of the Situation in I Corps Zone (I CTZ),
Republic of Vietnam**

1. General. This estimate has been prepared to bring the situation in the I Corps Zone, RVN, up to date in order to facilitate preparation of a Commander's Estimate for operations in the zone.
2. Terrain Analysis
 - a. In general, the terrain in the I Corps Zone does not lend itself to large scale military operations due to the vast areas covered by steep, thickly forested mountains. It is bounded on the north by the DMZ and on the west by the poorly defined 227-mile border with Laos. The Zone is divided into a populous and comparatively narrow coastal plain and a mountainous region which extends to the west, north and south outside the limits of the Corps Zone. Separating the two regions is a zone of piedmont three to five miles in width which is less densely settled than the plain and which supports dry farming. The western portion of the Zone is an extremely rugged mountainous jungle with peaks rising to 6,000 feet. The jungle growth has three levels: (1) a closely matted growth covering the floor and restricting movement to a maximum of three miles a day cross country; (2) a tree layer rising to about 70 feet; and (3) another layer rising to about 170 feet. Both of the upper layers provide a canopy which restricts observation and permits unobserved movement on the ground.
 - b. The mountainous interior is the domain of the Viet Cong primarily by default. The highlands are inhabited by ethnic minorities. As an example of the sparsity of population, Quang Nam Province has a population of 555,000 of which less than 35,000 live in the western 3/5ths of the province.
 - c. Lines of communication point out the importance of the coastal zone. Particularly noteworthy is the present status of the routes leading inland from Route #1. Route #9, which generally parallels the DMZ, is completely closed. Bridges have been destroyed along the entire route which also has been dug up in many places. This normally serves the military post of Khe Sanh and the border station at Lao Bao. It also serves the only concentration of people in the western extremes of the I CTZ. Route #14 leads WSW toward Kontum Province from the junction with the coast highway near Danang. Trafficability is extremely poor during the rainy season, and the VC periodically interdict and isolate extensive portions of the route throughout the year. The most important remaining feeder road in the I CTZ is Route #5 which extends from Route #1 in Quang Ngai Province a distance of 99 miles to Kontum.
3. Friendly Situation. Under I Corps at the present time, are the 1st and 2d Vietnamese Infantry Divisions headquartered at Hue and Quang Ngai respectively. These divisions are augmented by a separate infantry regiment, a separate infantry battalion and three Ranger battalions which are permanently

stationed in the CTZ. Their mission is to protect the strategic objectives within the five northern provinces and to furnish ARVN presence along the DMZ in the north. ARVN forces in I CTZ total 32,782. There are also 18,225 Regional Forces, 23,025 Popular Forces, and 2,418 CIDG personnel. Total RVN ground forces are approximately 76,450.

4. Enemy Situation

- a. The most recent estimate of confirmed VC/NVA forces in these five provinces is 25,330 men in regular units and 27,450 guerrillas for a total of 52,780.
- b. The control element for the VC in the Zone is the HQ, VC Military Region V which encompasses the northernmost twelve provinces of the RVN - five in the I CTZ and seven in the II CTZ.
- c. Directly subordinate to the MR V Hq, are four NVA division headquarters. Major combat elements in MR V include two confirmed VC regimental headquarters and 16 confirmed NVA regimental headquarters. Of these, one VC regiment and seven NVA regiments are located in the I CTZ.

5. Reinforcement Capability. Viet Cong/NVA strengths could be appreciably increased in the I CTZ over a relatively short time span in the form of an in-country re-allocation of VC/NVA elements from the II CTZ and/or contiguous areas of Laos. In addition to this, and of a more probable nature, is an increase in the infiltration rate from the NVN. Guerilla strengths will probably remain constant.
6. Enumeration of Enemy Capabilities. Listed below are possible enemy capabilities in the order of probable adoption.
 - a. Capability (1): Attack lines of communication and harass smaller installations while avoiding major battles. This is an ever present capability that will probably be exercised if the enemy is significantly out numbered.
 - b. Capability (2): Attack in I CTZ with up to one division. Exercising this capability with existing resources would provide the enemy with an opportunity to offset reverses recently suffered. It is, as well, a logical mission to be assigned by Hanoi to reduce the U.S. aircraft inventory.
 - c. Capability (3): Attack up to three dispersed installations simultaneously in regiment strength within 48 hours. With a demonstrated ability to simultaneously attack in dispersed locations, and for the same reasons as mentioned in paragraph 6.b., this is considered a capability probable of execution.
 - d. Capability (4): In conjunction with Capabilities (1), (2), or (3), reinforce with an infiltrated NVA regiment from outside RVN within 30 days. In the event the enemy so decides, he has only to repeat this proven capability.

- e. Capability (5): In conjunction with Capabilities (1), (2), (3), or (4); reinforce with a regiment (NVA or VC) from II Corps within 10 days. Because the enemy has exercised this capability once, and because of his retained interest in the Central Highlands, it is considered unlikely that this capability will be adopted.

NOTE: A comprehensive I Corps Intelligence Estimate is on file in the G-2 Division and is available to the Staff upon request.
