Intelligence Estimate of the Situation in I Corps Zone (I CTZ)
Republic of Vietnam

1. General. This estimate has been prepared to bring the situation in the I Corps Zone, RVN up to date in order to facilitate preparation of a Commander's Estimate for Operations in the zone.
2. Terrain Analysis
 - a. In general, the terrain in the I Corps Zone does not lend itself to large scale military operations due to the vast areas covered by steep, thickly forested mountains. It is bounded on the north by the DMZ and on the west by the poorly defined 227-mile border with Laos. The zone is divided into a populous and comparatively narrow coastal plain and a mountainous region which extends to the west, north and south outside the limits of the Corps Zone. Separating the two regions is a zone of piedmont three to five miles in width which is less densely settled than the plain and which supports dry farming. The western portion of the zone is an extremely rugged mountainous jungle with peaks rising to 6,000 feet. The jungle growth has three levels: (1) a closely matted growth covering the floor and restricting movement to a maximum of three miles a day cross country; (2) a tree layer rising to about 70 feet; and (3) another layer rising to about 170 feet. Both of the upper layers provide a canopy which restricts observation and permits unobserved movement on the ground.
 - b. The most important road in the I Corps Zone is National Route # 1. This route originates just south of the Demilitarized Zone, generally parallels the trace of the coast southward and finally terminates at the capital city of Saigon. There are three significant east/west roads, all of which join with National Route # 1. Route # 9 generally parallels the DMZ and leads into Laos. Route # 14 leads west and southwest from Danang into Kontum Province. Route # 74 originates south of Quang Ngai and terminates at Kontum City. With the exception of Route # 1, the roads in I Corps are generally characterized by sharp curves, steep grades and loose surfaces. They are subject to landslides and washouts during the rainy season. USMC forces have constructed additional roads for local use. The longest stretch of newly constructed road lies between Danang and the area of An Hoa (approx. 20 miles). The enemy has continuously harassed and sabotaged the roads in I Corps.
3. Friendly Situation. Under I Corps at the present time, are the 1st and 2d Vietnamese Infantry Divisions headquartered at Hue and Quang Ngai respectively. These divisions are augmented by a separate infantry regiment, a separate infantry battalion and three Ranger battalions which are permanently stationed in the CTZ. Their mission is to protect the strategic objectives within the five northern provinces and to furnish ARVN presence along the DMZ in the north. ARVN forces in I CTZ total 31,267. There are also 14,566 Regional Forces, 22,502 Popular Forces, and 3,112 CIDG personnel.

**Intelligence Estimate of the Situation in I Corps Zone (I CTZ)
Republic of Vietnam**

1. General. This estimate has been prepared to bring the situation in the I Corps Zone, RVN up to date in order to facilitate preparation of a Commander's Estimate for Operations in the zone.
2. Terrain Analysis
 - a. In general, the terrain in the I Corps Zone does not lend itself to large scale military operations due to the vast areas covered by steep, thickly forested mountains. It is bounded on the north by the DMZ and on the west by the poorly defined 227-mile border with Laos. The zone is divided into a populous and comparatively narrow coastal plain and a mountainous region which extends to the west, north and south outside the limits of the Corps Zone. Separating the two regions is a zone of piedmont three to five miles in width which is less densely settled than the plain and which supports dry farming. The western portion of the zone is an extremely rugged mountainous jungle with peaks rising to 6,000 feet. The jungle growth has three levels: (1) a closely matted growth covering the floor and restricting movement to a maximum of three miles a day cross country; (2) a tree layer rising to about 70 feet; and (3) another layer rising to about 170 feet. Both of the upper layers provide a canopy which restricts observation and permits unobserved movement on the ground.
 - b. The most important road in the I Corps Zone is National Route # 1. This route originates just south of the Demilitarized Zone, generally parallels the trace of the coast southward and finally terminates at the capital city of Saigon. There are three significant east/west roads, all of which join with National Route # 1. Route # 9 generally parallels the DMZ and leads into Laos. Route # 14 leads west and southwest from Danang into Kontum Province. Route # 74 originates south of Quang Ngai and terminates at Kontum City. With the exception of Route # 1, the roads in I Corps are generally characterized by sharp curves, steep grades and loose surfaces. They are subject to landslides and washouts during the rainy season. USMC forces have constructed additional roads for local use. The longest stretch of newly constructed road lies between Danang and the area of An Hoa (approx. 20 miles). The enemy has continuously harassed and sabotaged the roads in I Corps.
3. Friendly Situation. Under I Corps at the present time, are the 1st and 2d Vietnamese Infantry Divisions headquartered at Hue and Quang Ngai respectively. These divisions are augmented by a separate infantry regiment, a separate infantry battalion and three Ranger battalions which are permanently stationed in the CTZ. Their mission is to protect the strategic objectives within the five northern provinces and to furnish ARVN presence along the DMZ in the north. ARVN forces in I CTZ total 31,267. There are also 14,566 Regional Forces, 22,502 Popular Forces, and 3,112 CIDG personnel.
