PREFACE

This is the first volume of a chronology of Marine Corps activities, which covers the history of the U. S. Marines, derived from official records and appropriate published historical works. It is the compilation of five pamphlets which were previously published during 1961-1962. It is published for the information of all interested in Marine Corps activities during the period 1775-1934 and is dedicated to those Marines who participated in the events listed.

A CHRONOLOGY OF THE UNITED STATES MARINE CORPS

Part I

American Marines in the Revolution (1775-1785)

This chronology is presented in several parts as a compilation of historical dates concerning Marines which have been previously set forth by various authors as factual. No claim is made that all possible sources have been used.

The following sources have been used in Part I of this chronology:

Biographical Memoir of the Late Commodore Joshua Barney. Edited by Mary Barney. Boston: Gray and Bowen, 1832. (Cited as "Barney").

McClellan, Maj Edwin N. *History of the United States Marine Corps*. 2 vols. Washington: Historical Section, Headquarters U. S. Marine Corps, 1925-37. (This exceptionally well-documented work had limited distribution due to restricted printing. Volume 2 is incomplete. For further information refer to Historical Branch, G-3 Division, Headquarters Marine Corps). (Cited as "McClellan").

Morgan, William J. *Captains to the Northward*. Barre, Mass: Barre Gazette, 1959. (Cited as "Morgan").

Pennsylvania Archives, 2d Ser, Vol 15. (Cited as "Penn. Archives").

Many other sources were investigated, such as, Ben Franklin's Privateers, *The Secret War of Independence*, Historical Register of Virginians in the Revolution, articles in the Naval Institute Proceedings, etc., but unless there was a positive statement or evidence of the participation of American Marines in a particular event, no entry was made. Some sources used, such as, Maclay's *History of American Privateers* show many other naval engagements in which one strongly suspects the involvement of Marines but again positive evidence is lacking.
Part I - American Marines in the Revolution (1775-1785)

Introduction

Three general classes of American Marines served during the American Revolution--Continental or regular Marines, Marines of the colonial or states' navies, and Marines of the privateers.

There were a variety of other types of Marines who do not clearly fit into the three general classes. For example, there were Marines who served with Washington's fleet (several vessels ordered by General Washington to be fitted out to intercept supplies inbound for the British around Boston). These vessels were ordered by a Continental officer, manned in large part from a state regiment (Glover's Massachusetts Marine Regiment), and acted as privateersmen.

The Marines who served with Arnold on Lake Champlain were strictly speaking "irregulars" who were later given status by action of the Continental Congress. Most of the Marines who served with John Paul Jones aboard the Bon Homme Richard were actually French but in those days, many served as Americans who were not native born. Who can say dogmatically that all of these types were not "American" Marines? In any event, they acted as Marines and as part of American commands engaged in operations against the enemy.

Although no organization per se of Marines was authorized prior to 10 November 1775, it was common practice to have Marine detachments aboard warships of all types. American privateers entered the struggle at an early date. Their officers, seamen, and Marines were some of the earliest Americans to participate in the war. Before there were any Continental warships numerous Marines were serving on vessels belonging to the colonial or state navies. All states had navies except New Jersey and Delaware which only sent out privateers.

The rule of thumb for assigning Marines to ships was "One gun--one Marine" although ships often carried larger Marine detachments. The exact number of officers and men serving in the Marines during the revolution is not known. However, an estimate of their number (total of all types) would be between 12,000 and 15,000. (McClellan, v. I, Chap IV, p. 25).
THE AMERICAN REVOLUTION OPENED WITH THE BATTLES OF LEXINGTON AND CONCORD.

Existence of American Marines is established by the payroll for the Enterprise of 1 July which starts with this date. The first known Marine officer was Lieutenant James Watson, identified from this payroll. (McClellan, v. I, 1st ed., 2d Ser, Chap III, p. 6). (See entries for 10 Jun and 1 Jul).

At Skanesborough, Lake Champlain, a small British sloop was taken by men from Arnold's forces, renamed Liberty, manned with sailors and Marines, and sailed to Ticonderoga. (McClellan, v. I, 1st ed., 2d Ser, Chap III, p. 4).

TICONDEROGA WAS TAKEN BY MEN UNDER ETHAN ALLEN AND BENEDET ARNOLD; CROWN POINT WAS TAKEN NEXT DAY. (McClellan, v. I, 1st ed., 2d Ser, Chap III, p. 4).

At St. John's on Lake Champlain, Marines from the Liberty under B. Arnold participated in the capture of a British sloop which was renamed Enterprise and manned with seamen and Marines from the expedition. (McClellan, v. I, 1st ed., 2d Ser, Chap III, p. 5).

The first recorded mention of American Marines is cited in an account which describes eight Connecticut Marines escorting money for troops to Albany, New York, for further shipment to Ticonderoga. These Marines are often referred to as the "Original Eight." (McClellan, v. I, Chap III, p. 3).

A resolution of the Continental Congress brought all American forces (including Marines) operating at Crown Point, Ticonderoga, and on Lake Champlain under control of Congress and provided that the men would be paid from 3 May. (Metcalf, p. 7).

Marines participated in the action between the Katy and Washington (Rhode Island Navy) and the armed tender of the British frigate Rose. (McClellan, v. I, Chap III, p. 5).
1 Jul The oldest existing record of Continental Marines is on a payroll of this date for period from 3 May for the Enterprise which lists 1 Marine officer and 17 Marines. (Metcalf, p. 6). The payroll for the Liberty has not been found.

7 Sep Marines participated in the recapture of the unarmed ship Unity by the Hannah (Washington's fleet) off the Massachusetts coast. (Clark, p. 7).

5 Oct The first time the Continental Congress mentioned Marines was when it directed General Washington to give orders for the "Proper encouragement to the Marines and seamen" who served on two armed vessels under "Continental risque and pay." (McClellan, v. I, Chap III, p. 7).

10 Oct Marines participated in the action between the Hannah (Washington's fleet) and the British sloop Nautilus off the Massachusetts coast. (Clark, p. 11).

13 Oct Congress directed two vessels for the regular Navy be acquired and fitted out. Personnel were also authorized; since Marines were a normal part of ships' complements, this is first authorization of Continental Marines. (McClellan, v. I, Chap III, p. 11).

Oct Marines participated in the capture of a large British ship by the Spy (Conn. Navy). (Paullin, p. 357).
5 Nov Marines participated in the capture of the British provision vessels Polly and Industry by the Harrison (Washington's fleet) off Boston. (Clark, p. 44).

7 Nov Marines participated in the recapture of the sloop Ranger by the Lee (Washington's fleet) in Massachusetts Bay. (Clark, p. 58).

10 Nov An organization of Marines was authorized when the Continental Congress made the following resolution:

"Resolved, That two battalions of Marines be raised consisting of one colonel, two lieutenant-colonels, two majors, and other officers, as usual in other regiments; that they consist of an equal number of privates with other battalions; that particular care be taken that no persons be appointed to office, or enlisted into said battalions, but such as are good seamen, or so acquainted with maritime affairs as to be able to serve to advantage by sea when required; that they be enlisted and commissioned to serve for and during the present War with Great Britain and the colonies, unless dismissed by order of Congress; that they be distinguished by names of First and Second Battalions of American Marines, and that they be considered as part of the number which the Continental Army before Boston is ordered to consist of."

It appears that this organization was designed to be in addition to Marine ship detachments and was planned for expeditionary purposes. (McClellan, v. I, Chap III, p. 13).

11 Nov Marines participated in the action between the Defence (S. C. Navy) and the British ships Tamar and Cherokee at Charleston, South Carolina. (McClellan, v. I, Chap V, p. 1).

17 Nov Marines from the Hancock and the Franklin (Washington's fleet) participated in an un-opposed landing at Charlottetown, Prince Edward Island. (Clark, p. 51).
19 Nov  In answer to orders from Congress to supply personnel for the Marine organization authorized 10 November, General Washington objected that since they "must be acquainted with maritime affairs" he would have to disrupt many organizations in picking and choosing. (McClellan, v. I, Chap III (1st Rev), p. 18).

20 Nov  Marines participated in a raid by the Hancock and the Franklin (Washington's fleet) on Canso Harbor, Nova Scotia. (Clark, p. 55).

24 Nov  Marines from the Harrison (Washington's fleet) participated in the boarding of a brig within view of three British warships who subsequently engaged the Harrison, in Boston Bay. (Clark, p. 82).

27 Nov  Marines participated in the capture of the sloop Polly by the Lee (Washington's fleet) off N.E. coast of U.S. (Clark, p. 60).

28 Nov  Samuel Nicholas of Philadelphia was commissioned a Captain of Marines by the Continental Congress. His commission was confirmed prior to that of any other officer of the Continental naval service. (McClellan, v. I, Chap III, p. 10).

28 Nov  Marines participated in the capture of an ordnance transport, the brig Nancy, by the Lee (Washington's fleet) in Massachusetts Bay. (Clark, p. 60).

1 Dec  Marines participated in the capture of the ship Concord by the Lee (Washington's fleet) about 30 miles off Boston. (Clark, p. 61).

4 Dec  Marines were aboard the Washington (Washington's fleet) when she was captured by the British frigates Fowey and Lively in Massachusetts Bay. (Clark, p. 85).

8 Dec  Marines participated in the capture of the British ship Jenny and brig Little Hannah by the Lee (Washington's fleet) in Massachusetts Bay. (Clark, p. 91).

17 Dec  Marines participated in the capture of the sloop Betsy by the Lee (Washington's fleet) in Massachusetts Bay. (Clark, p. 94).
24 Dec Marines participated in the recapture of the sloop Sally by the Warren (Washington's fleet). (Clark, p. 96).

Dec The first Continental Marine unit formed as such was a regular Marine detachment placed on board the Cabot. (Metcalf, p. 12).

1785

"At no period of the naval history of the world is it probable that Marines were more important than during the War of the Revolution. In many instances they preserved the vessels to the country by suppressing the turbulence of ill-assorted crews, and the effect of their fire...has been singularly creditable to their steadiness and discipline." (Collum, p. 41).

The Navy of the Revolution, and, consequently, the Marines, was allowed to dwindle away after the fighting was over.

The last entry for 1785 given intimations of troubles ahead for the youthful country. These troubles will develop in the next part with the Marines again playing an active role in the defense of their country.
A CHRONOLOGY OF THE UNITED STATES MARINE CORPS

by

Colonel W. M. Miller, USMC

Part II

Early Days of the Marine Corps (1786-1819)

This chronology is presented in several parts as a compilation of historical dates concerning Marines which have been previously set forth by various authors as factual. No claim is made that all possible sources have been used.

The following sources have been used in Part II of this chronology:

Annals of Congress, 5th Congress. (Cited as "AC").

Goldsborough, Charles W. The United States Naval Chronicle. Washington: James Wilson, 1824. (Cited as "Goldsborough").

Home of the Commandants. Washington: Leatherneck Association, 1956. (Cited as "Commandants").

Logabect, Historical Branch. (Cited as "Log").

McClellan, Maj Edwin W. History of the United States Marine Corps. 2 vols. Washington: Historical Section, Headquarters, U. S. Marine Corps, 1931. (This exceptionally well-documented work had limited distribution due to restricted printing. Volume 2 is incomplete. For further information refer to Historical Branch, 9-3 Division, Headquarters, Marine Corps). (Cited as "McClellan").

Many other sources were investigated, such as Truxtun of the Constellation, The Proudest Day, The First Americans in North Africa, articles in the Naval Institute Proceedings, etc. but the information contained therein is found also in the sources shown. Unless there was a positive statement or evidence of the participation of Marines in a particular event, no entry was made.

**Introduction**

The ratification of the Constitution in 1789 established the legal basis for armed forces for the new United States but it was not until 1794 that Congress took action to reactivate the Navy. In an act passed that year ships were authorized, as were the personnel to man them including, as was customary for the period, Marines. The passage of this Act marked the beginning of a period of great activity for Marines.

We find that there were now only two general classes of Marines--U. S. or regular Marines and Marines of the privateers. The protection of the States was a function of the Federal Government and the states no longer maintained their navies. Also, with a strong central government the many types of quasi-Marines of the Revolutionary period found no reason for existence.

The second part of the chronology opens with the events leading up to the establishment of the Marine Corps on a permanent basis. The "Early Days" were busy ones for the Corps as they saw action in many parts of the globe.

Conclusion

The Quasi-War accustomed Marines to fighting, helped them perfect their organization, and solidly established Marine traditions of steadiness, resourcefulness and courage. The Tripolitan War of 1801-1805 gave birth to a mission which in the future would become paramount for Marines—the providing of expeditionary forces immediately available for employment with the fleet. At Tripoli, naval blockades, bombardments, and offers of ransom proved ineffectual until an expeditionary force brought the Bashaw to terms.

By the time of the War of 1812, the Marines had established their usefulness. McClellan in Chapter XX of his first volume evaluated their service as follows:

"There never has been a war when the Marines did more, in proportion to their numbers, than in this war. The credit belongs to Lieutenant-Colonel Commandant Franklin Wharton. He solved the problem of placing Marines upon about seventy naval vessels; and in providing a strong battalion that participated in several land engagements including the Battle of Bladensburg; of having an efficient company at New Orleans ready for Commodore Daniel Todd Patterson and Major-General Andrew Jackson to use in the defence of New Orleans; of developing a seasoned "expeditionary force" to support land operations of the Commodore Isaac Chauncey's Squadron in the Lake Ontario theatre of war; and of maintaining sufficient forces throughout the United States to carry on the usual naval and military mission of the Corps."

The conclusion of the War of 1812 allowed the Marines a short breathing spell although anti-pirate operations still were active. From this time on, however, there will be few years when we don't find Marines active in some part of the world.

Introduction

According to the history books, several decades of peace followed the War of 1812. The Marine Corps of that day would not subscribe to that premise. Although the Corps was small in numbers, Marines were active throughout the world. Early in the period covered by this Part, a vibrant personality took command of the Marine Corps. With Archibald Henderson as Commandant, life would not be calm and restful and he remained at the head of the Corps for nearly 39 years.

Conclusion

Suppression of slave trade, anti-piratical operations, Indian fighting, the Mexican War, and the various landings around the world to protect American lives and property cover the general activities of the Marine Corps from 1820 to 1860. Although still few in numbers, Marines were involved in most of the events by which our country was becoming respected throughout the world. There is a story in almost every incident at which this Chronology can only hint.

Colonel Commandant Archibald Henderson, the "grand old man of the corps," instituted many reforms in the administrative features of the Marine Corps and pushed training to a high level. The Marine Corps was ready for employment as the Civil war loomed on the horizon.
A CHRONOLOGY OF THE UNITED STATES MARINE CORPS

Part IV

American Marines from the Civil War to the Era of Caribbean Interventions, 1860-1903

This chronology is presented in several parts as a compilation of historical dates concerning United States Marines which have previously been set forth by various authors as factual. No claim is made that all possible sources have been used. The following sources have been used in Part IV of this chronology:

Catton, Bruce. Mr. Lincoln's Army. Garden City, New York: Doubleday and Company, Inc., 1953. (Cited as "Catton (2)").

Home of the Commandants. Washington: Leatherneck Association, 1956. (Cited as "Commandants").

Logsheet of Historic Marine Corps Dates, Historical Branch, 0-3 Division, Headquarters, U. S. Marine Corps. (Cited as "Log").
Many other sources were investigated, such as Secretary of the Navy Reports, articles in the U. S. Naval Institute Proceedings and the Marine Corps Gazette, The National Archives, and other sources. In some cases, the participation of Marines in a specific event was clear, but in others, it was not as evident. Therefore, the data that was collected should be interpreted with caution.
Introduction

Part IV of this Chronology is concerned with the participation of Marines in the War Between the States and their operations through the years to the era of Caribbean interventions. With Marine Corps strength at no more than 3,300 officers and enlisted men during the era of the War Between the States, Marines were mostly destined for duty with the fleet, providing the core of the landing forces, manning the secondary guns in battle, and maintaining order and discipline among the ships' crews. For some 40 years following the war, in spite of lesser numbers on the rolls, Marine activities continued to be extended to various areas throughout the world, with up to two-thirds of the Corps' strength at times deployed abroad.

Conclusion

The big event of the period from 1860 to 1903 was the War Between the States. During that war, Marines were employed almost exclusively on ships of the Union fleets, manning the ships' secondary guns in numerous engagements and providing small landing forces on many occasions. In strength, the Marine Corps grew from about 2,400 officers and enlisted men to 3,900. The latter level was maintained for the three decades following the war, with the Marine Corps remaining a small stabilized force chiefly engaged in shipboard pursuits and shore-based guard duty.

With the coming of the War with Spain, however, the pace quickened. The outbreak of the war found Marines manning 15 different shore stations on both coasts of the United States and serving on 35 regular ships of the Navy in addition to 5 receiving ships. More Marines were needed to meet the additional responsibilities of an ever-widening United States interest abroad. In view of this, Congress, in 1896, authorized 500 more men for the Corps. Two years later, Congress provided an additional temporary increase of 1,040 enlisted men and 24 officers.

The years 1898 through 1903 witnessed Marines of the Corps serving in both the Caribbean area and in the Far East, with no lessening of their former responsibilities. During this era, the Marine Corps came of age, preparing itself to take a firm footing in the pages of the military annals of the twentieth century.

Conclusion

During the 30 years to 1934, the Marine Corps gained valuable experience in operating against irregular forces from the Caribbean to the Far East. World War I witnessed Marines of the Corps fighting as part of the American Expeditionary Forces in Europe. Aviation units began to develop, cooperating with ground forces in preparation for the utilization of the Marine air/ground team concept of the coming era. Development of the Navy/Marine Corps partnership continued, culminating in the establishment of the Fleet Marine Force in 1933.
